MARINE CONCEPTS G.M. APPOINTED

Cape Coral, FL – Marine Concepts President and Owner, J. Robert “Bob” Long, recently announced the appointment of Matthew Chambers to General Manager effective immediately. An 11-year marine industry veteran, Chambers held management positions with Westport Shipyards, Wellcraft, U.S. Marine, and K2 Industries.

“Since it would take a special individual to not only fit into Marine Concepts’ talent-filled organization, but to also help guide the team in growing the company while maintaining Marine Concepts proven reputation for quality and customer satisfaction, this appointment was given a great deal of consideration,” said Bob Long (President/Owner). “Taking into account his track record and complimentary references as a make-it-happen person, I feel fortunate to have located Matt,” he continued.

Chambers comes with 16 years of composite experience. His leadership, experience, and knowledge and understanding of quality systems fits well with Marine Concepts’ already well-established reputation. He and his wife, Jeanne, and two daughters, Katie and Gina, will relocate to Lee County in the near future; son, Neal, will remain in Washington State.

Chambers will report to Bob Long and oversee operations at all of Marine Concepts’ production facilities.

Marine Concepts employs 100+ people working in nearly 60,000 sq.ft. of design and manufacturing facilities in Cape Coral, Sarasota, and Pine Island, Florida. Providing design, milling, tooling, and testing services to the fiberglass industry, it was founded in 1976.
